ESENSE IT, Nagpur

📅 06/2023 - 07/2024
📍 Nagpur, Maharastra

E SENSE IT is an innovative agency helping businesses grow with advanced digital transformation by providing customised solutions made through strategy, design and development .

- Developed and optimized Node.js APIs for real-time data retrieval.
- Implemented CRUD operations on the backend, ensuring seamless functionality.
- Created a responsive React.js UI for live project integration.
- Successfully met live project deadlines, optimizing APIs for enhanced efficiency.
- Led frontend development for the admin-side UI in a live environment.
- Designed and implemented a dynamic payment gateway system for live transactions.

Web Designer Intern

SRS Info System, Nagpur

📅 08/2022 - 10/2022
📍 Nagpur, Maharastra

SRS Infosystems is an IT company based in Nagpur, India offering services in the area of application development, maintenance, product engineering, staff augmentation and outsourcing. It was founded on the vision of reducing cost of technology for companies and individuals

SUMMARY

As a Front End Developer specializing in React.js, I design high-performance user interfaces and implement responsive, scalable applications using Redux and Flux. I collaborate with cross-functional teams to translate wireframes into maintainable code. With expertise in JavaScript, HTML5, CSS, and TypeScript, I utilize tools like Babel, PostCSS, and Webpack for optimization. I conduct code reviews and focus on DOM manipulation, JavaScript APIs, and SEO optimization to ensure efficient and testable code. My problem-solving abilities drive continuous innovation.

PROJECTS

Chat Application

🔗 https://github.com/Bhayjain/Chat_App.git

Developed a real-time chat application using the MERN stack, focusing on creating a secure and user-friendly messaging platform.

- Implemented secure user authentication and authorization using JWT.
- Set up MongoDB Atlas for data storage and optimized queries for efficient data retrieval.
- Optimized APIs to enhance overall system efficiency.
- Designed and implemented the user interface using Chakra UI, enhancing development speed and visual appeal.
- Integrated Socket.IO for real-time messaging and notifications.
- Enabled group chat functionality, allowing users to create and manage groups with multiple participants.

Hatimi (Hotel Mangment Project)

🔗 https://hatimiretreats.com/

Led frontend development for Hatimi Hotel Management Project, creating a user-friendly admin-side UI.
Implemented a robust payment gateway system for live transactions and developed an efficient, dynamic booking calendar with enhanced functionality through conditional logic.

- Designed and implemented an actively used, comprehensive payment gateway system for live transactions.
- Developed a dynamic booking calendar, enhancing efficiency in displaying and managing live bookings.
- Implemented backend CRUD operations to ensure seamless functionality.
- Gained valuable insights into backend and frontend development processes.
- Improved the user interface for a better client experience.Utilized MongoDB database for optimizing backend data.

Goodvibes

🔗 https://goodvibeswithin.com/

Developed a dynamic and responsive application focused on enhancing user engagement through positive content.

- Implemented CRUD (Create, Read, Update, Delete) operations for efficient data management.
- Worked extensively with APIs to integrate dynamic data into the application.
- Utilized React and Redux for state management and front-end development.
- Developed mechanisms for safelyretrieving live job data for deletedusers using unique keys.
- Recognized returning users for a personalized experience and managed seamless transitions for newlive users.
- Applied HTML to optimize websitefunctionality.
